

Commercial Bakery - Colorado Ski Resort

Reference No. 10088

Revenues: \$1,200,000
Cash Flow: \$200,000
Asking price: \$750,000

Opportunity Summary

This well-established commercial bakery operation was founded 10 years ago. It is the largest commercial bakery in the region and has consistently surpassed \$1 million in annual revenues. The company's 20 employees produce over 300 different bakery products, including 20 to 30 signature products like ciabatta breads, cinnamon rolls, and a line of artisan breads. The new owner will benefit greatly from the business' loyal base of customers: the company's baked products are distributed to approximately 100 retail customers, including the major local supermarkets. The asking price is well justified by the business' established reputation, steady revenues, and growth potential. This is an excellent opportunity for a buyer with a bakery background or for a newcomer looking to step into an extremely well run operation.

Competition

There are very few similar businesses in the area. This company distinguishes itself by its large product offering and the excellent quality of its baked products.

Opportunities

There is significant growth potential for a new owner. A geographic expansion of the business is an opportunity for growth. The business would significantly benefit from an additional location in a neighboring region. Also, expanding its distribution channels to other areas of the state would result in an increase in revenues.

Facilities

The company's facility is located in a leased 3,300 sq. ft. freestanding building in an industrial park area. Significant equipment and supplies are included in the sale, including 2 delivery trucks.

Seller Involvement

Seller is willing to help with the transition.

Seller Financing

Limited seller financing is available.
